OVERVIEW OF INDUSTRY STRUCTURE AND DEVELOPMENT

India holds an important place in the global education industry. The country has more than 1.4 million schools with over 227 million students enrolled and more than 36,000 higher education institutes. India has one of the largest higher education systems in the world. However, there is still a lot of potential for further development in the education system.

Indian Education sector is expanding with the help of technology. It is enabling to overcome barriers of distance and scale. Many universities and education institutes have started using technology for various processes like Online Admission, Examination Management.

India is one of the largest education markets in the world with an estimated one million schools and more than 15,000 higher education institutes. With higher education institutes of repute being less and competition increasing every day, every good course is opting for entrance tests.

Ace integrated Solutions Limited is an India's leading Recruitment & Examination Services Management Company, bringing together the Domain Expertise and innovative skills required for the successful execution of the project every time with highest level of security and customer satisfaction. We have over 16000 Sq. Ft. area which is well equipped with the Equipment and machinery required for the execution and production of all the deliverables involved in any of the Recruitment and Examination Project.

OPPORTUNITIES AND CHALLENGES

The online test preparation industry is seeing a huge investment from technology start-ups who want to cash in on the need of student for flexi learning at lower costs. A lot of advantages make this mode of learning popular:

- Removes physical barriers for greater reach and can target larger masses. The far rung areas where the student does not have access to coaching benefit the most with this mode of learning.
- Affordable for every student. A traditional system charges anywhere between INR 50000 to INR 2,00,000 for their courses whereas an online or digital mode can offer these services at a third of cost.
- Flexibility in studying. Online and digital courses are downloadable, can be accessed anytime, anywhere and allow a student to multitask while studying.

The Indian online education market has a huge opportunity for businesses including:

Coverage of education: Many regions in India still lack basic education infrastructure. With internet penetrating even the remotest areas, these areas can be targeted for services.

Youth targeting: Indian youth is technology savvy and looking for ways where they can study while earning or doing other things. The student doesn't want to be confined to the four walls of their house but have an option to study anywhere.

Exams going national: Earlier each state used to conduct their own exams for entrance but with the exams going national, online test prep players can formulate courses for a whole nation's audience instead of local focus.

Despite the excitement that these opportunities bring, it cannot be emphasised enough that like every business, entering the online test preparation industry is also not a cake walk. It poses many challenges which have to be curtailed to get a foothold in this industry. Some of these challenges are listed below:

Lack of awareness and access: In spite of the industry's growth, there are millions of students who still lack awareness about these courses. Players like Aakash and iProf have introduced tablets and digital courses but many regions in India still lack computer and internet connectivity.

Change in learning methodology: Our school systems have always emphasised on learning within a fixed period of time and our intelligence calculated on our speed of learning. With online learning, the system has reversed.

Competition with traditional preparation centres: Though online test prep industry is gaining acceptance and popularity, a major chunk of market share is retained by retail networks like TIME, Career Launcher etc and Local stars who have been dominating their cities for ages. The popular mindset still considers traditional coaching where they can see a teacher and interact physically to be better than a virtual teaching mode where a student practically studies alone.

Current examination process includes many activities including exam paper generation, distribution of exam paper to the respective centers in secure way, conducting the exam, collection of answer sheets and passing those answer sheets to examiner for checking, moderation of the answers, result declaration. Traditional examination process is time consuming and result declaration process gets delayed. Another aspect of this traditional process is it depends on human work so it is prone to error.

Internet Penetration

Internet penetration in India is enabling things for improvement in examination process. Many educational institutes have started using Online Assessment Platform to conduct examination. Online Assessment process brings automation to overall examination process and result processing becomes easy, manual errors also get reduced drastically.

Challenge of internet

Even though internet penetration is decent in India but still there is issue for its availability and speed in some of the areas mainly at tier 2/3 cities or rural India. In case of internet failure or non satisfactory performance, conducting online examination may become challenging.

Local Deployment of the Service

Online assessment can be conducted with the help of online/ Offline combinational model. In case of areas where internet is a challenge, examination can be deployed on local server machine and users who want to appear for the assessment can connect to this local server. Users can complete their assessment without internet connection. As soon as assessment process is completed local server gets synced with the main server to save assessment details for the candidate.

Usage of Flash Drive/ CD to Conduct Assessment

Online assessment can be conducted with the help of setup deployed on Flash drive/ CD. Such setup can be executed on local machine to initiate the assessment. Entire assessment/ examination process would be conducted offline on local machine using local machine capability. There would be need of internet only when information is to be submitted to main server for result processing.

Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.****10. Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.**

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

11. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, and floods in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India (‘ICAI’). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, safeguarding of its assets, prevention and detection of frauds and errors, accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the ‘Guidance Note’) and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143 (10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditors’ judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting

to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial control over financial reporting were operating effectively as at March 31, 2018, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India.
