OVERVIEW OF INDIAN ECONOMY

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF). The Government of India has forecasted that the Indian economy will grow by 7.1 per cent in FY 2016-17. As per the Economic Survey 2016-17, the Indian economy should grow between 6.75 and 7.5 per cent in FY 2017-18. The improvement in India’s economic fundamentals has accelerated in the year 2015 with the combined impact of strong government reforms, Reserve Bank of India’s (RBI) inflation focus supported by benign global commodity prices.

India’s consumer confidence index stood at 136 in the fourth quarter of 2016, topping the global list of countries on the same parameter, as a result of strong consumer sentiment, according to market research agency, Nielsen. Moody’s has affirmed the Government of India’s Baa3 rating with a positive outlook stating that the reforms by the government will enable the country perform better compared to its peers over the medium term.

MARKET SIZE

India’s gross domestic product (GDP) grew by 7 per cent year-on-year in October-December 2016 quarter, which is the strongest among G-20 countries, as per Organisation for Economic Co-operation and Development (OECD) Economic Survey of India, 2017. According to IMF World Economic Outlook Update (January 2017), Indian economy is expected to grow at 7.2 per cent during FY 2016-17 and further accelerate to 7.7 per cent during FY 2017-18.

The tax collection figures between April 2016 and January 2017 show an increase in Net Indirect taxes by 16.9 per cent and an increase in Net Direct Taxes by 10.79 per cent year-on-year, indicating a steady trend of healthy growth. OUTLOOK OF INDIAN ECONOMY

India continues to be the fastest growing major economy in the world. As per provisional estimates, real GDP grew by 7.9 percent in 2015-16 compared with 7.2 per cent in 2014-15. The second advance estimate for GDP growth for 2016-17 is placed at 7.1 percent. The currency reform initiative will move the Indian economy to a less cash trajectory, increase tax compliance and reduce the threats from counterfeit currency which acts as a source of terror funding. Growth is expected to gain strength in the following years due to externalities derived from deep structural reforms implemented by Government and robust aggregate demand.

CPI inflation which has been easing since August 2016 increased modestly to 3.65 percent in February 2017 against 3.17 percent in January 2017. Though it has marginally risen to 3.81 percent in March, 2017, it is well within the medium term CPI inflation target of 4 percent.

At the system level, the banks are adequately capitalized. Policies for resolution of NPLs including optimal structuring of credit facilities, change in ownership/management, deep restructuring of stressed assets and facilitation of speedy exit from unviable accounts have been put in place. Additionally, the amendments to debt recovery laws as well as the enactment of Insolvency and Bankruptcy Code 2016 would provide enabling infrastructure to deal effectively with the recovery of NPLs in a time bound manner.

The Government is infusing capital in Public Sector Banks (PSBs) to meet their capital requirements in line with global risk norms and to spur credit growth. Recent announcements made by Prime Minister for the provision of cost effective credit to farmers and housing loans to the poor including enhanced access of credit for MSMEs would enlarge the scope of institutional credit delivery to the hitherto under-banked segments of the economy.

The progress of financial inclusion efforts has been remarkable with 282 million accounts opened by banks under the no-frills PMJDY so far. The objective of the scheme is to provide all households in the country with financial services, with special focus on empowering the weaker sections of society, including women, small and marginal farmers and laborers, both rural and urban. Attractive low cost life and health insurance and pension plans introduced by the Government have expanded the social safety net for weaker sections of the society. Micro Units Development and Refinance Agency (MUDRA) is active in facilitating structured microcredit deliveries to small scale entrepreneurs for productive activities. Supported by AADHAR, the biometric based unique identity system for individuals, the ongoing rapid expansion of digital payment mechanisms will provide large push to financial inclusion efforts.

The wide ranging liberalisation of the FDI policy in recent years is expected to provide major impetus to employment and job creation. Most of the sectors, except a small negative list, are now under the automatic approval route. India is now the most open economy in the world for FDI. Net FDI inflows during April-February 2016-17 increased to US \$ 35.25 billion from US \$ 34.49 billion during the same period in the previous year. The increasing strength of economic fundamentals has made India the most sought after destination for investments.

India's foreign exchange reserves were placed at US \$ 368.99 billion as of April 7, 2017. The Current Account Deficit (CAD) was very much at sustainable level of 1.3 percent and 1.1 percent in 2014-15 and 2015-16, respectively. The CA deficit for the three quarters of 2016-17 improved further to 0.7 percent of GDP.

The Gross Fiscal Deficit (GFD) was contained at 3.5 percent in 2016-17 following a steady path of fiscal consolidation without compromising on the public investment requirements of the economy and spending on programs for poverty alleviation. The quality of fiscal adjustment is reflected in the improvement in revenue deficit to 2.1 percent in the revised budgetary estimate vis-à-vis 2.5 percent in 2015-16. Next year the revenue deficit will be reduced further to 1.9 percent to below 2 percent mandated by the FRBM Act. The GFD for the year 2017-18 is pegged at 3.2 percent with a commitment to achieve 3 percent in the following year. The steady approach towards fiscal consolidation is being judiciously adopted to avoid excessive curtailment of public

investment- in view of the need for higher public expenditure in the context of sluggish private sector investment and subdued global growth.

For the current financial year, the Union Budget 2017-18 has significantly increased resource allocation for infrastructure as well as rural, agricultural and allied sectors. The allocation for the rural employment guarantee scheme has also been increased substantially. The government would continue to increase fiscal resilience through greater focus on the quality of expenditure and higher tax realizations including those that would accrue from large cash deposits made in banks due to demonetization. The Budget for 2017-18 shows firm resolve to boost investment in agriculture, social sector, infrastructure and employment generation on the one hand and simultaneously pursue the path of fiscal consolidation on the other. The delivery of AADHAAR based direct benefit transfers (DBT) has succeeded in plugging unwarranted leakages resulting in substantial savings to the Government. The GST will deliver significant externalities by way of improved taxation efficiency and the ease of doing business and will convert India into one common market.

Widely encompassing reforms have been put in place which, inter alia, include the Goods and Services Tax Act, AADHAAR (Targeted Delivery of Financial and Other Subsidies, Benefits and Services) Act 2016, rationalization of subsidies, enactment of Insolvency and Bankruptcy Code 2016 and operationalization of National Company Law Tribunal (NCLT) and National Company Law Appellate Tribunal (NCLAT) for the new corporate insolvency framework. Other policy initiatives include implementation of the hybrid annuity model for PPP, passage of Mines and Mineral Amendment Act, announcement of National Capital Goods Policy, directions to PSEs for expediting arbitration in construction sector, roadmap for rapid adoption of digital payments system, extensive liberalization of the FDI regime and improvements in governance processes in infrastructure delivery. Alongside steady progress in India's ranking in Ease of Doing Business, the Government's flagship program 'Make in India' encourages new processes, new infrastructure, new sectors and new mindset to boost entrepreneurial energy. Affirmative policies to arrest declining Child Sex Ratio (CSR) and empowerment of women over the life-cycle continuum and those for enhancing female employment are being vigorously pursued.

INDUSTRY OVERVIEW

India holds an important place in the global education industry. The country has more than 1.4 million schools with over 227 million students enrolled and more than 36,000 higher education institutes. India has one of the largest higher education systems in the world. However, there is still a lot of potential for further development in the education system.

India has become the second largest market for e-learning after the US. The sector is currently pegged at US\$ 2-3 billion, and is expected to touch US\$ 40 billion by 2017. The distance education market in India is expected to grow at a Compound Annual Growth Rate (CAGR) of around 34 per cent# during 2013-14 to 2017-18. Moreover, the aim of the government to raise its current gross enrolment ratio to 30 per cent by 2020 will also boost the growth of the distance education in India.

(Source: <https://www.ibef.org/industry/education-sector-india.aspx>)

Indian Education sector is expanding with the help of technology. It is enabling to overcome barriers of distance and scale. Many universities and education institutes have started using technology for various processes like Online Admission , Examination Management.

India is one of the largest education markets in the world with an estimated one million schools and more than 15,000 higher education institutes. With higher education institutes of repute being less and competition increasing everyday, every good course is opting for entrance tests.

OPPORTUNITIES AND CHALLENGES

The online test preparation industry is seeing a huge investment from technology start-ups who want to cash in on the need of student for flexi learning at lower costs. A lot of advantages make this mode of learning popular:

- Removes physical barriers for greater reach and can target larger masses. The far rung areas where the student does not have access to coaching benefit the most with this mode of learning.
- Affordable for every student. A traditional system charges anywhere between INR 50000 to INR 2,00,000 for their courses whereas an online or digital mode can offer these services at a third of cost.
- Flexibility in studying. Online and digital courses are downloadable, can be accessed anytime, anywhere and allow a student to multitask while studying.

The Indian online education market has a huge opportunity for businesses including:

Coverage of education: Many regions in India still lack basic education infrastructure. With internet penetrating even the remotest areas, these areas can be targeted for services.

Youth targeting: Indian youth is technology savvy and looking for ways where they can study while earning or doing other things. The student doesn't want to be confined to the four walls of their house but have an option to study anywhere.

List companies: Companies like NIIT and institutes like IIM's offer online courses which draws more and more students each year. With content being the king, a company focussed on student needs can succeed in the market. Even foreign universities are showing an interest in tying up with Indian universities now.

Untapped market: The online test preparation industry in India offers coaching for competitive exams like CAT, IIT-JEE, GRE, GMAT etc and still has a lot of untapped regions.

Exams going national: Earlier each state used to conduct their own exams for entrance but with the exams going national, online test prep players can formulate courses for a whole nation's audience instead of local focus.

Despite the excitement that these opportunities bring, it cannot be emphasised enough that like every business, entering the online test preparation industry is also not a cake walk. It poses many challenges which have to be curtailed to get a foothold in this industry. Some of these challenges are listed below:

Lack of awareness and access: In spite of the industry's growth, there are millions of students who still lack awareness about these courses. Players like Aakash and iProf have introduced tablets and digital courses but many regions in India still lack computer and internet connectivity.

Change in learning methodology: Our school systems have always emphasised on learning within a fixed period of time and our intelligence calculated on our speed of learning. With online learning, the system has reversed.

Competition with traditional preparation centres: Though online test prep industry is gaining acceptance and popularity, a major chunk of market share is retained by retail networks like TIME, Career Launcher etc and Local stars who have been dominating their cities for ages. The popular mindset still considers traditional coaching where they can see a teacher and interact physically to be better than a virtual teaching mode where a student practically studies alone.

Current examination process includes many activities including exam paper generation, distribution of exam paper to the respective centers in secure way, conducting the exam, collection of answer sheets and passing those answer sheets to examiner for checking, moderation of the answers, result declaration. Traditional examination process is time consuming and result declaration process gets delayed. Another aspect of this traditional process is it is depends on human work so it is prone to error.

Internet Penetration

Internet penetration in India is enabling things for improvement in examination process. Many educational institutes have started using Online Assessment Platform to conduct examination. Online Assessment process brings automation to overall examination process and result processing becomes easy, manual errors also get reduced drastically.

Challenge of internet

Even though internet penetration is decent in India but still there is issue for its availability and speed in some of the areas mainly at tier 2/3 cities or rural India. In case of internet failure or non satisfactory performance, conducting online examination may become challenging.

Local Deployment of the Service

Online assessment can be conducted with the help of online/ Offline combinational model. In case of areas where internet is a challenge, examination can be deployed on local server machine and users who want to appear for the assessment can connect to this local server. Users can complete their assessment without internet connection. As soon as assessment process is completed local server gets synced with the main server to save assessment details for the candidate.

Usage of Flash Drive/ CD to Conduct Assessment

Online assessment can be conducted with the help of setup deployed on Flash drive/ CD. Such setup can be executed on local machine to initiate the assessment. Entire assessment/ examination process would be conducted offline on local machine using local machine capability. There would be need of internet only when information is to be submitted to main server for result processing.

Syncing of the information

Information management from local to cloud based database is critical in such arrangement. Data security related process are also critical to make sure that examination data is not tampered by third party user outside this system. System also needs to ensure database remains in sync with all the local server deployments.

EMPLOYEES STATE INSURANCE ACT, 1948

The promulgation of Employees' State Insurance Act, 1948 (ESI Act), by the Parliament was the first major legislation on social Security for workers in independent India. It was a time when the industry was still in a nascent stage and the country was heavily dependent on an assortment of imported goods from the developed or fast developing countries. The deployment of manpower in manufacturing processes was limited to a few select industries such as jute, textile, chemicals etc. The legislation on creation and development of a fool proof multi-dimensional Social Security system, when the country's economy was in a very fledgling state was obviously a remarkable gesture towards the socio-economic amelioration of a workforce though limited in number and geographic distribution. India, notwithstanding, thus, took the lead in providing organized social protection to the working class through statutory provisions.

The ESI Act, 1948, encompasses certain health related eventualities that the workers are generally exposed to; such as sickness, maternity, temporary or permanent disablement, Occupational disease or death due to employment injury, resulting in loss of wages or earning capacity-total or partial. Social security provision made in the Act to counterbalance or negate the resulting physical or financial distress in such contingencies, are thus, aimed at upholding human dignity in times of crises through protection from deprivation, destitution and social degradation while enabling the society the retention and continuity of a socially useful and productive manpower.

It also provides for the manner and time period within which a complaint shall be made to the Internal Complaints Committee i.e. a written complaint is to be made within a period of 3 (three) months from the date of the last incident. 3. Significant Accounting Policies:

3.1 Use of Estimates

The preparation of financial statements in conformity with GAAP in India requires the management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent

liabilities at the date of financial statements, and the reported amount of revenues and expenses during the reporting period. Actual results could differ from these estimates. On an ongoing basis, estimates are evaluated based on historical experience and on various other assumptions that are believed to be reasonable, the results of which forms the basis for making judgments about the carrying value of assets and liabilities. Actual results could differ from those estimates. Any revision to estimates or difference between the actual result and estimates are recognized in the period in which the results are known/ materialized.

Residual value is a part of closing WDV. The difference between their WDV as on 1st April, 2014 and their residual value has been adjusted through the profit & loss account for the year ending 31-03-2014.

(iv) For the assets existing on 1st April, 2014 which still have useful life as per the prescribed life, Depreciation has been provided on WDV basis on such rates so as to depreciate them up to 95% of their actual cost till their remaining life.

An impairment loss for an asset is reversed, if and only if, the reversal can be related objectively to an event occurring after the impairment loss was recognized, the carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior year/s.
